[Ubisoft Games For Mac](#)

I've looked far and wide into the Internet and have tried various techniques (reinstalling AC2, logging off of steam and reinstalling, restarting my computer and reinstalling, finding an updated version of Ubisoft Game Launcher and replacing the old one, etc) will no avail.. Has anyone run into this problem recently?

When I try opening AC2, I get a message saying 'Unable to find Ubisoft Game Launcher,' suggesting that I should try reinstalling the game (Error Code 1).
